

Pratiksha Singh

Software Engineer | .NET Core & React Developer | 4 Years Experience
Virar, Maharashtra | +91 7773994061 | pratikshas2111@gmail.com

PROFESSIONAL SUMMARY

Results-oriented Software Engineer with 4+ years of experience building scalable web applications, RESTful APIs, and security automation systems using .NET Core, ASP.NET MVC, React.js, and SQL Server. Demonstrated expertise in SOAR platform integration, CI/CD pipeline setup, Azure cloud deployments, and Docker containerization. Proven track record of reducing API latency by 30%, improving query performance by 20%, and mentoring junior engineers. Adept at Agile/Scrum environments with strong problem-solving and cross-functional collaboration skills.

KEY ACHIEVEMENTS

- Reduced API latency by 30% across multiple modules through targeted .NET Core optimizations
- Improved database query performance by 20% on MySQL and Oracle via indexing and stored procedure tuning
- Integrated Digio digital signature API, cutting manual verification effort by 40%
- Built modular HR platform serving 5,000+ users with React.js dashboards and .NET Core APIs
- Mentored 2 junior engineers on .NET Core, Git workflows, and code review best practices • Rated top performer for quality, timeliness, and team collaboration

CORE TECHNICAL SKILLS

Backend: .NET Core (3.1 / 6.0 / 8.0), ASP.NET MVC, C#, Entity Framework, PetaPoco ORM, LINQ, REST APIs, Microservices
Frontend: React.js, Angular, HTML5, CSS3, JavaScript (ES6+), jQuery, Bootstrap, Redux
Databases: SQL Server, MySQL, Oracle (12c/19c) — Stored Procedures, Triggers, Views, Query Optimization
Cloud & DevOps: Azure (App Services, Azure DevOps, Azure Pipelines), Docker, CI/CD, Git, GitHub, IIS, Quartz.NET, Windows Services
Monitoring & Tools: ELK Stack (Elasticsearch, Logstash, Kibana), Postman, Swagger, Jira
Security & Integrations: SOAR Connectors, SMTP, SharePoint, Blowfish Encryption, TLS 1.3, Digio API, Qualtrics API
Methodologies: Agile (Scrum), SDLC, CI/CD Fundamentals, Code Review

PROFESSIONAL EXPERIENCE

- Software Engineer | Sequertek Pvt. Ltd., Mumbai

Mar 2024 – Present
- Designed and built SOAR connectors using .NET Core 8.0, automating 15+ security workflows and third-party integrations, reducing manual SOC response time by 35%
 - Deployed microservices to Azure App Services using Docker containers and Azure DevOps CI/CD pipelines, cutting release cycle time by 40%
 - Implemented React.js dashboards for real-time SOC alert monitoring, improving analyst visibility and response speed

- Optimized MySQL and Oracle database operations via query restructuring and indexing, improving performance by 20%
- Built secure, scalable API architecture using PetaPoco ORM and Entity Framework with role-based access control
- Contributed to SOC platform integrations ensuring high availability through modular, testable code practices
- Contributed to development in 2 production ready modules in IGA(Identity Governance & Administration) product in ACM AM and OP/OPER Id creation in IDAM(product name)
- Also build PDF utility using PDFSharpCore Library where dataset will be served from IDAM which is developed on .Net 4.8 framework and the utility is acting as a microservice which will create pdf with special formatting , font styles.

.NET Developer | MobiTrail Technologies, Mumbai

Jul 2020 – Feb 2024

Project: Channel Partner Portal – Mirae Asset

- Developed full-stack admin portal for DSA commission management using .NET Core 3.1, Razor Pages, and React.js frontend components
- Integrated Digo API for digital signature workflows, reducing manual verification effort by 40% and improving turnaround time
- Built Azure-hosted CI/CD pipeline using Azure DevOps for automated builds, tests, and deployments to staging and production
- Designed SQL Server reporting module with stored procedures to generate real-time commission reports for 200+ partners

Project: MyTaj – Indian Hotels Company Ltd.

- Built modular HR platform managing 5,000+ users with React.js UI components, .NET Core APIs, and SQL Server backend
- Integrated Qualtrics APIs for employee feedback analytics, building interactive dashboards with charts and KPI visualizations
- Implemented JWT-based authentication and role-based access control across the platform
- Containerized application using Docker for consistent dev/staging environments and reduced onboarding time

Project: GodrejBRM – Godrej Properties

- Designed and delivered a risk management system with automated SharePoint data sync using Windows Services and .NET Core
- Configured IIS with SSL and implemented TLS 1.3 secure releases, achieving zero critical security vulnerabilities post-launch
- Built internal mailer service secured via Blowfish encryption with configurable scheduling via Quartz.NET
- Created React.js-based reporting views for risk dashboards, integrating with REST APIs for live data rendering

Project: eMeetings – Internal Platform

- Developed meeting management module with .NET Core backend and React.js frontend, supporting scheduling and minutes tracking
- Integrated SQL Server with Entity Framework for structured data storage and audit logging

EDUCATION

B.Sc. in Information Technology | University of Mumbai | 2021

CERTIFICATIONS & TRAINING

-
- CompTIA Cloud Essentials – Udemy
 - AWS Cloud Fundamentals – Self-Learning

- [Azure DevOps & CI/CD – Self-Learning \(Microsoft Learn\)](#)
